D. Reading / 20 marks

Read the story. Then choose the best answer.

Students notice fewer plants and insects around a pond after a drought. They investigate how a scarce water supply affects the ecosystem. Changes in one population may cause other populations to increase or decrease. Their report describes interactions without claiming that one observation proves every cause.

16. What event occurs before the observations? (4 marks)

A. a concert B. a snow festival C. a drought

17. What do students notice near the pond? (4 marks)

A. only more cars B. new buildings C. fewer plants and insects

18. What resource is scarce? (4 marks)

A. plastic B. electricity C. water

19. How can population changes relate? (4 marks)

A. one may affect others B. all change identically C. they never interact

20. What does the report avoid? (4 marks)

A. claiming one observation proves every cause B. noting uncertainty C. describing interactions
