A. acceleration B. zero movement always C. constant speed by definition

D. Reading / 20 marks

Read the story. Then choose the best answer.

Students measure the distance a toy cart travels over a fixed time. They calculate average speed and compare trials before changing the slope. They ask when the cart accelerates and which measurements might contain error. Technology helps collect data, but careful reasoning is still needed to solve the problem.

16. What moves in the activity? (4 marks)

A. a real spacecraft B. a toy cart C. a river

17. What is held fixed initially? (4 marks)

A. the cart's final position B. every speed forever C. the measured time interval

18. What do students calculate? (4 marks)

A. only mass B. average speed C. only temperature

19. What do they change later? (4 marks)

A. the number system B. the slope C. the definition of a meter

20. What remains necessary despite technology? (4 marks)

A. blind trust in every number B. only a larger graph C. careful reasoning
